

WebCORE® Reporting Suite

Pre-defined and customisable reporting On-demand metrics and evaluation

Accurate and regular reporting promotes the smooth and effective management of your corporate real estate portfolio. Delivered in various highly visualised formats, reports can be shared amongst users through our intuitive interface.

Reporting is automated by WebCORE® via a number of different modules and tools. These include Space Reports, Report Writer module and our new Reporting Tool.

Reports can be broken down by Region and Business Unit and focus on:

- Portfolio size and cost
- Employee counts
- Vacancy rates

Automate the process and use reports to manage costs, churn, occupancy, utilisation and more.

Use the data to highlight opportunities and inform operational and strategic decisions.

WebCORE® calculates a 'Chargeable Area' based on the actual assigned space, along with the pro-rate of all shared space in use by the relevant cost centre. Each building or floor can be assigned a cost per area and hence the actual cost of the space to each cost centre can be determined.

Reports have been designed in close collaboration with our clients to make sure that not only are they delivering the right information but we are using the right visualisation tools for each report.

Reporting Suite: Automate, analyse and act

Innovation from
The Changing Workplace

WebCoRE® Reporting Suite

Report types include:

Sqft/sqm comparisons | Organisational hierarchy
Actual versus budget | Occupant and occupancy data
Desk and Room counts | Asset management data
Vacancy/open desks/rooms
Historical and/or comparison reporting
Interaction with departmental databases
Charge-back reporting by cost centre/business unit
Cost centre and organisational roll-up updating

workspace
support space
unoccupiable space
- **Space Utilisation**
(when linked to Footfall or MobileCoRE survey data)

Further information

Our Reporting Suite can combine, integrate, report and share data from all WebCoRE modules for efficient and effective reporting. It can also report across disparate and third party systems such as PeopleSoft and SAP.

About The Changing Workplace & WebCoRE®

The Changing Workplace is a specialist corporate real estate management company, based in the UK, with a global client base that includes some of the world's best-known companies.

A high-calibre team helps multi-site and multi-national organisations create, manage and improve their centralised real estate functions. This is achieved by providing specialised support in three key areas: innovative technology, expert consultancy and first class data management services.

WebCoRE® is a flexible and highly effective interface tool that delivers a powerful suite of hosted CAFM (computer-aided facilities management) systems to facilitate easy and accurate management of your corporate real estate portfolio.
