WebCORE® Locator

Locate employees/assets simply and quickly
exact physical location in an instant

Take advantage of the latest in location management technology to revolutionise the way you find and track the positions of people, assets and departments within your organisation.

The Locator module is a powerful tool used to quickly pinpoint the exact physical location of staff and assets within a building or organisation.

A user-defined grid is created over AutoCAD floorplans, generating unique identification codes for every possible site. These are exported to searchable databases enabling end users to quickly locate and track people or assets as required.

Link Locator to your company's internal phonebook for added functionality, and detail staff-specific information such as extension number, email, workstation ID and even photographs.

2M+
hits per year

Locator can:

- Provide accurate tracking and updating of all employees and assets
- Identify the location of key employees and assets
  (such as Fire Wardens, First Aiders and defibrillators)
- Link to your internal phonebook to provide employee-specific information
- Use the MS Outlook plug-in to view locations on a floorplan
- Code and locate any item with a footprint
- Enable staff to monitor and update their information
  (thereby improving data integrity)
- Be easily accessed from any Internet-enabled device

Locator: find who or what you need in an instant

Further information

Locator is a highly effective yet simple to use module. It is designed to be either standalone or embedded within your corporate intranet.

About The Changing Workplace & WebCoRE®

The Changing Workplace is a specialist corporate real estate management company, based in the UK, with a global client base that includes some of the world's best-known companies.

A high-calibre team helps multi-site and multi-national organisations create, manage and improve their centralised real estate functions. This is achieved by providing specialised support in three key areas: innovative technology, expert consultancy and first class data management services.

WebCoRE® is a flexible and highly effective interface tool that delivers a powerful suite of hosted CAFM (computer-aided facilities management) systems to facilitate easy and accurate management of your corporate real estate portfolio.
