MobileC⊙RE®

Mobile Corporate Real Estate

Surveys
on the move

The Changing Workplace®

MobileC**O**RE®

Innovation, observation, customisation

MobileC**O**RE® is the mobile companion app to our Corporate Real Estate and Facilities Management software WebC**O**RE®.

With intuitive and customisable survey functionality it completely negates the need for cumbersome paper-based plans during floor walks.

Mobile is fast becoming the dominant platform for interacting with people and places, conducting surveys and viewing information on the web.

Developed in response to legal requirements for space audits, advances in technology and client expectations, MobileC**O**RE® allows mobile reporting and visualisation of building occupancy data.

A range of survey types are available that help build evidence-driven analysis and understanding of real estate performance and productivity. These include:

- Occupancy/utilisation
- Observation of employee activities
- Storage levels and capacities
- Asset/floor conditioning

Other customised surveys can also be achieved.

Instantly capture how space is being used during specific time-frames and record the type of activities taking place.

Key benefits

- Save time and money
- Go paperless and empower your CRE teams
- Enhance staff agility, mobility and productivity
- Discover your occupancy data performance
- Improve space usage and reduce wastage
- Maximise efficiencies in your building portfolio

Put yourself in control

You can customise the survey questions, putting you in control of what you want to survey, where, how and when. The speed and ease with which surveys can be conducted and uploaded can help to further improve your organisational processes and enhance team productivity.
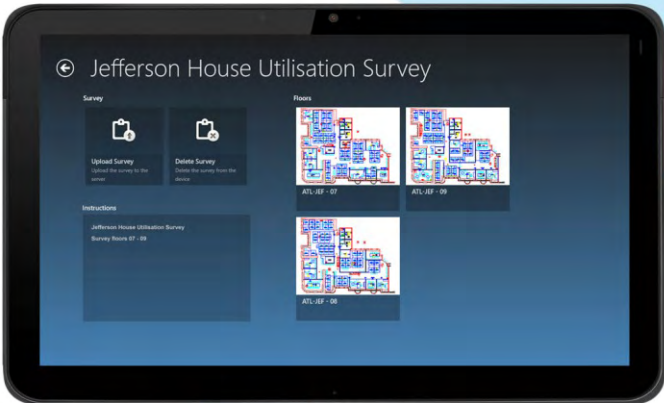

Mobile and agile expectations in the workplace mean you need relevant technology to work for you, providing secure access and seamless communication with both your team and your stakeholders. In today's ever changing business landscape it's essential to capture and deliver information quickly and easily by embracing mobile technology solutions.

Create your own survey rules by adding time intervals, surveys per day and categories for drop downs

Add further details, including images or video, to a specified arbitrary location using HotSpots. This gives an instant visual of any issues or opportunities that have been flagged up

Download the floors you wish to survey directly to your device so you can work offline

Review survey progress for each timeslot. Upload surveys to fully report on your data capture

Change the way you work
Book a MobileCoRE® demo today

Client testimonial

"We wanted greater flexibility and mobility for our occupancy surveys and MobileCoRE® has given us this and more.

"The highly visual reporting, plus the survey range and customisation that's possible makes for a relevant and innovative app.

"It has undoubtedly helped us to better measure and understand our occupancy data performance and productivity.

"Highly recommended!"

WebCoRE®

The solution to all your real estate management needs

WebCoRE® from The Changing Workplace (CWP) is a suite of modules that help your CRE teams manage and report on your portfolio.

All you need is Internet access.

WebCoRE® is not an out of the box solution as we believe a tailored approach is better suited to complex, multi-site and multi-national companies.

We listen carefully to your requirements so that from the outset you get the most from the system, and we work constantly with you to ensure the solution continues to fulfil your needs.

CWP offers a fully-managed service and will assign a project team to you.

Key features include:

- Fully customisable and 100% web-based
- Link to third party applications such as SAP and PeopleSoft
- APIs allow bi-directional data transfer to and from WebCoRE®
- Modular user-friendly system
- Easy to use navigation
- Variable user permissions for single point entry
- WebCoRE® can be themed to match your corporate identity
